

THE REVOLUTIONARY DOOR STOP

VETO Fantom is a revolutionary door stop and hold open device that alleviates the trip hazard of traditional door stops. A flush mounted pin is recessed into the floor and activated by a powerful magnet to locate the pin into the keep as the door passes over the pin when opening. To release, simply pull the door closed.

KEY FEATURES

- Flush floor mounted
- Powerful rare earth magnet induced hold open
- Alleviates trip hazards
- Available in various finishes to match existing ironmongery or flooring
- For doors with a door to floor gap of 3 - 10mm

200261	Black	1	24
200278	Chrome	1	24
200296	White	1	24

TYPE - BSA

SUB TYPE - BSA01

FUNCTIONALITY

SOFT / MEDIUM CONTROLLED OPENING STRENGTH, HOLD OPEN IS ACTIVATED.

(FIGURE A + B)

When the door is opened in a controlled fashion, the unique striker plate design will hold the pin in an activated position and keep the door in a firm hold opened position.

From this hold open position, the door can be easily closed with minimal effort.

HARD / FAST UNCONTROLLED OPENING STRENGTH, FANTOM WORKS AS DOOR STOP ONLY.

(FIGURE C)

When the door is opened in a fast, uncontrolled fashion the Fantom Stop works only as a door stop.

Hold open device will not activate. The pin will engage the back stop angle on the striker plate, preventing the door from passing over the Fantom Stop.

VETO FANTOM DIAMOND CORER

For use when installing the Fantom Doorstop in a tiled flooring surface. The Fantom Diamond Corer allows for a clean, round 14mm hole to be drilled into tiled surfaces. NOTE: Drill slowly, starting on a 45° angle and always use with water.
